

Coronavirus - Appeal in several languages for forwarding and attention

Dear fellow citizens,

Corona is not to be taken lightly. Due to the Corona pandemic it is necessary to follow the guidelines of the federal, state and local authorities. The risk of infection should be kept to a minimum. This is achieved, among other things, by

- **Staying at home**
- **Reducing our social contacts to the absolute necessary**
- **Keeping distance to other people - also when shopping**
- **Observing the rules of hygiene**

Unfortunately, not all of our fellow citizens are yet aware of the risk of infection, which in the worst case can also result in death. On television, radio and social media such as Facebook etc. there are daily reports on the latest status of this highly contagious disease. Many people have already died from it. We should all think here not only of ourselves, but also of our sick, burdened, weaker fellow human beings.

It depends on every single one of us. Therefore help to prevent the virus from spreading even faster. Think of the danger you put us all in if you don't keep your distance from people.

Quotes from the general ruling of the city of Ludwigshafen:

**4. The following are forbidden**

a. Meetings in clubs, other sports and leisure facilities as well as the perception of offers in adult education centres, music schools and other public and private educational institutions in the extracurricular sector (including driving schools and examination facilities) as well as coach tours,

**b. Meetings in churches, mosques, synagogues and the meetings of other faith communities.**
